

Product Datasheet

Glucose-6-Phosphate Dehydrogenase (G6PDH) Activity Colorimetric Assay Kit (orb1173255)

Description	Biorbyt CheKine Micro Glucose-6-Phosphate Dehydrogenase (G6PDH) Activity Assay Kit is designed for d...
Storage	Storage at 4°C and protected from light upon receipt. Kit has a storage time of 12 months form receipt.
Note	For research use only
Application notes	The kit provides a simple method for detecting glucose-6-phosphate dehydrogenase (G6PDH) activity in a variety of biological samples such as serum, plasma, tissues, cells , plants and bacteria. In the assay, G6PDH present in the sample converts NADP+ to NADPH, which has an absorbance at 340 nm. The absorbance of NADPH is proportional to the G6PDH activity present in the sample.
Hazard Information	The product listed herein is for research use only and is not intended for use in human or clinical diagnosis. Suggested applications of our products are not recommendations to use our products in violation of any patent or as a license. We cannot be responsible for patent infringements or other violations that may occur with the use of this product.
Expiration Date	Please enquire.
