DRD2 Antibody (orb1267361)

DRD2 Antibody

Western blot analysis showing Hsp70 expression in cerebellum and brain after kainic acid treatment. The blot displays protein bands for Hsp70 (95, 72, 55, 36, 28, 17 kDa) and tubulin (loading control). The lanes are labeled: cerebellum, brain, kainic acid, and kainic acid + Hsp70 inhibitor. An arrowhead points to the Hsp70 band in the kainic acid lane.
