Description ^{nts.}	NAMPT Antibody	kaki bishara Talah
Species/Host	Rabbit	
Reactivity	Human	
Conjugation	Unconjugated	1 0 10 100 1000
Tested Applications	ELISA, WB	To detect Human
Immunogen	Produced from sera of rabbits immunized with highly pure recombinant Human Visfatin. Human Visfatin specific antibody was purified by affinity chromatography employing an immobilized Human Visfatin matrix.	Visfatin by sandwich ELI
Target	NAMPT	dina.
Form/Appearance	Lyophilized	
Concentration	batch dependent	
Storage	The lyophilized antibody is stable for at least 2 years from date of receipt at -20°C. The reconstituted antibody is stable for at least two weeks at 2-80°C. Frozen aliquots are stable for at least 6 months when stored at -20°C. Avoid repeated freeze-thaw cycles.	To detect Human Visfatin by Western
Note	For research use only	Blot
Application notes	ELISA:Sandwich:To detect Human Visfatin by sandwich ELISA (using 100 μ L/well antibody solution) a concentration of 0.5 - 2.0 μ g/mL of this antibody is required. This antigen affinity purified antibody, in conjunction with Blorbyt's Biotinylated Anti-Human Visfatin (38-282) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant Human Visfatin.Western Blot:To detect Human Visfatin by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 μ g/mL. Used in conjunction with compatible secondary reagents the detection limit for recombinant Human Visfatin is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.	To detect Human Visfatin by Western Blot
Clonality	Polyclonal	
Uniprot ID	P43490	
NCBI	P43490	
Expiration Date	12 months from date of receipt.
