SARS-CoV-2 (COVID-19) S1 RBD Single Domain Antibody [RBD-2B9] (orb1274196)

Figure 1 is a line graph showing the binding of RBD protein to anti-RBD antibody. The y-axis represents OD (450nm) ranging from 0.0 to 3.0. The x-axis represents Antibody (ng/ml) on a logarithmic scale from 1000 to 0.1. Two data series are plotted: RBD Protein (blue line with circles) and anti-RBD antibody (green line with triangles). Both curves show a decrease in OD as the antibody concentration decreases, with the RBD protein curve being slightly higher than the anti-RBD antibody curve.
