Application notes

Approx 110kDa band observed in lysates of cell line NIH3T3 (calculated MW of 118kDa according to NP_001158045.1). Recommended concentration: 0.1-0.3 µg/ml. An additional band of unknown identity was also consistently observed at 28kDa. This band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field-have any such results been reported with other antibodies/lysates Have any further splice variants/modified forms been reportedWB: Approx 110kDa band observed in lysates of cell line NIH3T3 (calculated MW of 118kDa according to NP_001158045.1).
