| <b>Note</b>                | For research use only                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Application notes</b>   | Detect Range: 156 pg/mL-10000 pg/mL.<br>Sensitivity: 10 pg/mL. Gene_name: SLAMF1.<br>Gene_full_name: Signaling lymphocytic activation molecule. Protein_name: Signaling lymphocytic activation molecule.<br>Sample Type: cell culture supernates cell lysates tissue homogenates serum and plasma (heparin EDTA). Tmb_incubation: 20-25 min. Capture_antibody: monoclonal antibody from mouse. Detection_antibody: polyclonal antibody from goat.<br>Research_category: immunology cell type markers cd non-lineage microbiology interspecies interaction host virus interaction stem cells hematopoietic progenitors surface molecules hematopoietic stem cells hsc markers. Sequence_similarities: Contains 1 Ig-like C2-type (immunoglobulin-like) domain. Tissue_specificity: Constitutively expressed on peripheral bloodmemory T-cells T-cell clones immature thymocytes and aproportion of B-cells and is rapidly induced on naive T-cellsafter activation. |
| <b>Expiration Date</b>     | Please enquire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
