| <b>Description</b>         | Human CCL14/HCC-1 ELISA Kit                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Reactivity</b>          | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Tested Applications</b> | ELISA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Note</b>                | For research use only                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Application notes</b>   | <p>Detect Range: 15.6 pg/mL-1000 pg/mL. Sensitivity: 10 pg/mL. Gene_name: CCL14. Gene_full_name: C-C motif chemokine 14. Protein_name: C-C motif chemokine 14. Sample Type: cell culture supernates cell lysates tissue homogenates serum and plasma (heparin EDTA). Tmb_incubation: 25-30 min. Capture_antibody: monoclonal antibody from mouse. Detection_antibody: polyclonal antibody from goat. Research_category: immunology innate immunity chemokines beta chemokines (cc) signal transduction metabolism vitamins minerals pathways and processes cofactors vitamins minerals.</p> <p>Sequence_similarities: Belongs to the intercrine beta (chemokine CC) family. Tissue_specificity: Expressed constitutively in several normal tissues: spleen liver skeletal and heart muscle gut and bonemarrow present at high concentrations (1-80 nM) in plasma.</p> |
| <b>Expiration Date</b>     | Please enquire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
