

## Product Datasheet

### Mitochondria (Marker for Human Cells); Clone AE-1 (Concentrate) Antibody (orb1712240)

|                          |                                                                          |
|--------------------------|--------------------------------------------------------------------------|
| <b>Description</b>       | Mitochondria (Marker for Human Cells); Clone AE-1 (Concentrate) Antibody |
| <b>Species/Host</b>      | Mouse                                                                    |
| <b>Reactivity</b>        | Human                                                                    |
| <b>Conjugation</b>       | Unconjugated                                                             |
| <b>Immunogen</b>         | Semi-purified mitochondrial preparation                                  |
| <b>Note</b>              | For research use only                                                    |
| <b>Application notes</b> | HeLa or HepG2 cells. Hepatic carcinoma.                                  |
| <b>Isotype</b>           | IgG1, kappa                                                              |
| <b>Clonality</b>         | Monoclonal                                                               |
| <b>Expiration Date</b>   | 12 months from date of receipt.                                          |
