

Product Datasheet

Rat PDGF-BB(Platelet Derived Growth Factor BB) ELISA Kit (orb1806909)

www.biorbyt.com

Descriptionnts. Rat PDGF-BB(Platelet Derived Growth

Reactivity Rat

Range 31.25-2000pg/mL

Target PDGFBB

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat PDGF-BB. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat PDGF-BB and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to

each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat PDGF-BB, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical

density (OD) is measured

spectrophotometrically at a wavelength of

450 nm ± 2 nm. The OD value is

proportional to the concentration of Rat

PDGF-BB. You can calculate the concentration of Rat PDGF-BB in the samples by comparing the OD of the samples to the standard curve.

Sample Types serum, plasma, Tissue homogenate and

Other biological samples

Sensitivity 18.75 pg/mL

Expiration Date Please enquire.
