Human CRH(Corticotropin Releasing Hormone) ELISA Kit (orb1807116)

Description	Human CRH(Corticotropin Releasing Hormone) ELISA Kit	
Reactivity	Human	
Range	3.91-250 pg/mL	
Target	CRH	0. 1 H HO HO Home (XEC constraining)(ed.)
Note	For research use only	
Application notes	This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human CRH. During the reaction, Human CRH in the sample or standard competes with a fixed amount of Human CRH on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human CRH. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The concentration of Human CRH in tested samples can be calculated by comparing the OD of the samples to the standard curve.	
Sample Types	serum, plasma, Tissue homogenate and Other biological samples	
Sensitivity	1.3 pg/mL	
Expiration Date	Please enquire.
