

Product Datasheet

Human TGFb3(Transforming Growth Factor Beta 3) ELISA Kit (orb1807181)

Descriptionnts.

Human TGFb3(Transforming Growth

3

www.biorbyt.com

Reactivity	Human	the state of the s
Range	15.63-1000 pg/mL	i u
Target	TGF-β3	till 10 100 100 Fanan (CF-pC cosentalioggini.)
Note	For research use only	
Application notes	This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human TGFb3. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human TGFb3 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human TGFb3, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme- substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human TGFb3. You can calculate the concentration of Human TGFb3 in the samples by comparing the OD of the samples to the standard curve.	
Sample Types	serum, plasma, Tissue homogenate and Other biological samples	
Sensitivity	5.47 pg/mL	
Expiration Date	Please enquire.
