

Product Datasheet

Human sgp130(Soluble Glycoprotein 130) ELISA Kit (orb1807213)

Descriptionnts.

Human sgp130(Soluble Glycoprotein 130)

1

www.biorbyt.com

B		
Reactivity	Human] u
Range	78.13-5000 pg/mL	u
Target	gp130	10 100 1000 1000 Human-galik Concentration(gchil)
Note	For research use only	
Application notes	This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human sgp130. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human sgp130 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human sgp130, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human sgp130. You can calculate the concentration of Human sgp130 in the samples by comparing the OD of the samples to the standard curve.	
Sample Types	serum, plasma, Tissue homogenate and Other biological samples	
Sensitivity	4.63 pg/mL	
Expiration Date	Please enquire.
