Human ApoA4(Apolipoprotein A4) ELISA Kit (orb1807688)

Description Human ApoA4(Apolipoprotein A4) ELISA Kit

Reactivity Human

Range 4.69-300 ng/mL

Target APOA4

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human ApoA4. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human ApoA4 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free

components are washed away. The substrate solution is added to each well. Only those wells that contain Human ApoA4, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzymesubstrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human ApoA4. You can calculate the concentration of Human

ApoA4 in the samples by comparing the OD of the samples to the standard curve.

Sample Types serum

Sensitivity 0.68 ng/mL

Expiration Date Please enquire.
