

Product Datasheet

Mouse TECK/CCL25(Thymus Expressed Chemokine) ELISA Kit (orb1807744)

www.biorbyt.com

Descriptionnts. Mouse TECK/CCL25(Thymus Expressed

Reactivity Mouse

Range 31.25-2000pg/mL

Target TECK/CCL25

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse TECK/CCL25. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse TECK/CCL25 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free

components are washed away. The

substrate solution is added to each well. Only those wells that contain Mouse TECK/CCL25, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzymesubstrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Mouse TECK/CCL25. You can calculate the concentration of Mouse TECK/CCL25 in the samples by comparing the OD of the samples to the standard curve.

Sample Types serum, plasma, Tissue homogenate and

Other biological samples

Sensitivity 18.75 pg/mL

Expiration Date Please enquire.
