

Product Datasheet

HLA-A antibody (orb181772)

Description

Mouse monoclonal antibody to HLA-A

Species/Host

Mouse

Reactivity

Human

Conjugation

Unconjugated

Tested

FC, IHC-Fr

Applications

Preservatives

Each vial contains 500 µl 0.2 mg/ml purified monoclonal antibody in phosphated buffered saline (PBS) containing 50% glycerol + 0.2% bovine serum albumin (rAlbumin) + 0.02% sodium azide.

Form/Appearance

Each vial contains 500 µl 0.2 mg/ml purified monoclonal antibody in phosphated buffered saline (PBS) containing 50% glycerol + 0.2% bovine serum albumin (rAlbumin) + 0.02% sodium azide.

Storage

Storage: The antibody is shipped at ambient temperature and may be stored at +4°C. For prolonged storage prepare appropriate aliquots and store at or below -20°C. Prior to use, an aliquot is thawed slowly in the dark at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance or the concentration of the product

Note

For research use only

Isotype

IgG2a

Clonality

Monoclonal

Source

BRA-23/9 is a mouse monoclonal IgG2a antibody derived by fusion of mouse myeloma cells with cells from a mouse immunized with REH cells, a human pre-B cell leukaemia cell line.

Uniprot ID

P30443

Hazard
