Application notes	ELISA: Peptide ELISA: antibody detection limit dilution 1:64000.WB: Approx 85-90kDa band observed in Human Heart lysates (calculated MW of 87.4kDa according to NP_003684;). Recommended concentration: 0.3-1.0 µg/ml. An additional faint band of 28kDa was consistently observed, however this band was not blocked by the immunizing peptide and it is therefore a non-specific signal. We call for caution when used for other assays than Western blot.
