

## Product Datasheet

# Goat FSH(Follicle Stimulating Hormone) ELISA Kit (orb1946518)

<b>Description</b>	Goat FSH(Follicle Stimulating Hormone) ELISA Kit
<b>Reactivity</b>	Goat
<b>Range</b>	2.82-180 ng/mL
<b>Target</b>	FSH
<b>Note</b>	For research use only
<b>Application notes</b>	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Follicle Stimulating Hormone(FSH) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Follicle Stimulating Hormone(FSH). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Follicle Stimulating Hormone(FSH) in the samples is then determined by comparing the OD of the samples to the standard curve.
<b>Sample Types</b>	serum, plasma and other biological fluids
<b>Sensitivity</b>	0.83 ng/mL
<b>Expiration Date</b>	Please enquire.
