

Product Datasheet

Rat GLO1(Glyoxalase I) ELISA Kit (orb1946872)

Description Rat GLO1(Glyoxalase I) ELISA Kit

Reactivity Rat

0.79-50ng/mL Range

GLO1 **Target**

Note For research use only

This ELISA kit uses the Sandwich-ELISA **Application notes**

principle. The micro ELISA plate provided in this

kit has been pre-coated with an antibody specific to Rat GLO1. Standards or samples are

added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat GLO1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat GLO1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by

yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Rat GLO1. You can calculate the concentration of Rat GLO1 in the samples by

the addition of stop solution and the color turns

comparing the OD of the samples to the standard curve.

Sample Types serum, plasma, Tissue homogenate and Other

biological samples

Sensitivity 0.47 ng/mL

Expiration Date Please enquire.
