

Product Datasheet

Human CAP1(Adenylate Cyclase Associated Protein 1) ELISA Kit (orb1947604)

Descriptionnts.

Human CAP1(Adenylate Cyclase

9-j

www.biorbyt.com

Reactivity	Human	Optical Density
Range	31.25-2000pg/mL	δu.
Target	CAP1	II eee
Note	For research use only	
Application notes	This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human CAP1. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human CAP1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human CAP1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme- substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human CAP1. You can calculate the concentration of Human CAP1 in the samples by comparing the OD of the samples to the standard curve.	
Sample Types	serum, plasma, Tissue homogenate and Other biological samples	
Uniprot ID	Q01518	
Sensitivity	18.75 pg/mL	
Expiration Date	Please enquire.
