Human UCN3(Urocortin 3) ELISA Kit (orb1947991)

Description Human UCN3(Urocortin 3) ELISA Kit

Reactivity Human

Range 31.25-2000pg/mL

Target UCN3

Note For research use only

Application notes This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this

kit has been pre-coated with an antibody specific to Human UCN3. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human LICN3 and Avidin-Horseradish

Human UCN3 and Avidin-Horseradish
Peroxidase (HRP) conjugate are added
successively to each micro plate well and
incubated. Free components are washed away.
The substrate solution is added to each well.
Only those wells that contain Human UCN3,

biotinylated detection antibody and Avidin-HRP

conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of $450 \text{ nm} \pm 2 \text{ nm}$. The OD value is proportional to the

concentration of Human UCN3. You can calculate the concentration of Human UCN3 in the samples by comparing the OD of the

samples to the standard curve.

Sample Types serum, plasma, Tissue homogenate and Other

biological samples

Uniprot ID Q969E3

Sensitivity 18.75 pg/mL

Expiration Date Please enquire.
