Human RNF4(Ring Finger Protein 4) ELISA Kit (orb1948942)

biorbyt

www.biorbyt.com

Reactivity Human	
Range 0.16-10ng/mL	
Target RNF4	
Note For research use only	
Application notesThis ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human RNF4. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human RNF4 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate wells and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human RNF4, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme- substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human RNF4. You can calculate the concentration of Human RNF4. You can calculate the concentration of Human RNF4. You can calculate the concentration of Human RNF4 in the samples by comparing the OD of the samples to the standard curve.	
Sample Typesserum, plasma, Tissue homogenate and Other biological samples	
Uniprot ID P78317	
Sensitivity 0.1 ng/mL	
Expiration Date Please enquire.
