

Product Datasheet

Human EFNA5(Ephrin A5) ELISA Kit (orb1949192)

Description	Human EFNA5(Ephrin A5) ELISA Kit	H.
Reactivity	Human	
Range	0.16-10ng/mL	
Target	EFNA5	NU NJ 1 10 10 Himae EX45 Cosectration for ball
Note	For research use only	anna an ta
Application notes	This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human EFNA5. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human EFNA5 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human EFNA5, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The OD value is proportional to the concentration of Human EFNA5. You can calculate the concentration of Human EFNA5 in the samples by comparing the OD of the samples to the standard curve.	
Sample Types	serum, plasma, Tissue homogenate and Other biological samples	
Uniprot ID	P52803	
Sensitivity	0.1 ng/mL	
Expiration Date	Please enquire.
