

## Product Datasheet

### Human CHD5(Chromodomain Helicase DNA Binding Protein 5) ELISA Kit (orb1949498)

## Description

Human CHD5(Chromodomain Helicase

## Reactivity

Human

## Range

18.75-1200pg/mL

## Target

CHD5

## Note

For research use only

## Application notes

This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human CHD5. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human CHD5 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human CHD5, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The OD value is proportional to the concentration of Human CHD5. You can calculate the concentration of Human CHD5 in the samples by comparing the OD of the samples to the standard curve.

## Sample Types

serum, plasma, Tissue homogenate and Other biological samples

## Uniprot ID

**Q8TDI0**

## Sensitivity

11.25 pg/mL

## Expiration Date

Please enquire.
