

## **Product Datasheet**

Rat CKLFSF5(Chemokine Like Factor Superfamily 5) ELISA Kit (orb1949521)

## www.biorbyt.com

**Description**nts. Rat CKLFSF5(Chemokine Like Factor

**Reactivity** Rat

**Range** 78.13-5000pg/mL

Target cklfsf5

**Note** For research use only

**Application notes** This ELISA kit uses the Sandwich-ELISA

principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat CKLFSF5.

Standards or samples are added to the

Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat CKLFSF5 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain

Rat CKLFSF5, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzymesubstrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The OD value is proportional to the concentration

of Rat CKLFSF5. You can calculate the concentration of Rat CKLFSF5 in the samples by comparing the OD of the samples to the standard curve.

Sample Types serum, plasma, Tissue homogenate and

Other biological samples

Sensitivity 46.88 pg/mL

**Expiration Date** Please enquire.
