

Product Datasheet

Phospholipase D antibody (Biotin) (orb21117)

Description

Biotin-conjugated IgG fraction of

phospholipase D from streptomyces c...

Species/Host

Rabbit

Conjugation

Biotin

Preservatives

Biotin-coupled hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.

Form/Appearance

Biotin-coupled hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added.

Storage

Storage: The lyophilised conjugate is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product

Note

For research use only

Clonality

Polyclonal

Source

Phospholipase D isolated and purified from streptomyces chromofuscus. Freund's complete adjuvant is used in the first step of the immunization procedure.

Uniprot ID

Q8KRU5

Hazard
Information

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals.
