

Product Datasheet

Goat IgG Guinea Pig IgG2 (HRP) antibody (orb21780)

www.biorbyt.com

Descriptionnts. Horseradish peroxidase-conjugated IgG

guinea pig IgG2, subc...

Species/Host Goat

Conjugation HRP

Preservatives Peroxidase-coupled purified

hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody

activity.

Form/Appearance Peroxidase-coupled purified

hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody

activity.

Storage Storage: The lyophilized conjugate is

shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight

precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the

immunoconjugate

Note For research use only

Clonality Polyclonal

Source Pools of purified polyclonal IgG2

isolated from pooled guinea pig. Freund's complete adjuvant is used in the first step of the immunization

procedure.

Hazard This product is intended FOR
