

Product Datasheet

Lysozyme antibody (orb21952)

Description

Rabbit polyclonal antibody to Lysozyme.

Species/Host

Rabbit

Reactivity

Human

Conjugation

Unconjugated

Immunogen

Highly purified recombinant human lysozyme was used as immunogen.

Preservatives

Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.

Form/Appearance

Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.

Storage

Storage: The lyophilized antiserum is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C

Note

For research use only

Clonality

Polyclonal

Source

Lysozyme, a bacteriolytic enzyme, has a molecular weight of about 15,000. Its concentration in plasma is low; in milk the concentration is reported to be between 5 and 220 mg/ml. Also tears contain a considerable amount of lysozyme. Highly purified recombinant human lysozyme was used as immunogen. Freund's complete adjuvant is used in the first step of the immunization procedure.

Uniprot ID

P61626

Hazard Information

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Nordic-MUBio accepts no liability for any inaccuracies or omissions in this information.

Expiration Date

12 months from date of receipt.
