Product Datasheet

Vascular endothelial growth factor A Chicken Polyclonal Antibody (orb234170)

Description	Vascular endothelial growth factor A Chicken Polyclonal Antibody	+/+
Species/Host	Gallus	47 kDa
Conjugation	Unconjugated	
Target	Vascular endothelial growth factor A	
Form/Appearance	Lyophilized purified total IgY in PBS pH7.4	Weste blot
Storage	Lyophilized antibodies can be kept at 4°C for up to 3 months and should be kept at -20°C for long-term storage (2 years). To avoid freeze-thaw cycles, reconstituted antibodies should be aliquoted before freezing for long- term (1 year) storage (-80°C) or kept at 4°C for short-term usage (2 months). For maximum recovery of product, centrifuge the original vial prior to removing the cap. Further dilutions can be made with the assay buffer. After the maximum long-term storage period (2 years lyophilized or 1 year reconstituted) antibodies should be tested in your assay with a standard sample to verify if you have noticed any decrease in their efficacy. To limit antibody loss or degradation, BSA (final concentration 1%) and sodium azide (final concentration 0.02%) can be added to the suggested first dilution. It is important to first verify if those preservatives are compatible with your assay.	analysi Vascu endot
Note	For research use only	
Clonality	Polyclonal	
Expiration Date	12 months from date of receipt.
