## **Product Datasheet**

### **Streptavidin antibody (Peroxidase) (orb344727)**

# biorbyt

| Description <sup>nts.</sup> | Streptavidin antibody (Peroxidase)  |
|-----------------------------|---|
| Species/Host                | Rabbit  |
| Reactivity                  | Bacteria  |
| Conjugation                 | HRP   |
| Tested<br>Applications      | ELISA, WB   |
| Immunogen                   | Streptavidin [Streptomyces avidinii]  |
| Preservatives               | 0.01% (w/v) Gentamicin Sulfate. Do NOT add Sodium<br>Azide!   |
| Form/Appearance             | Lyophilized   |
| Concentration               | 1.0 mg/mL   |
| Storage                     | Store vial at 4° C prior to restoration. For extended<br>storage aliquot contents and freeze at -20° C or<br>below. Avoid cycles of freezing and thawing.<br>Centrifuge product if not completely clear after<br>standing at room temperature. This product is stable<br>for several weeks at 4° C as an undiluted liquid.<br>Dilute only prior to immediate use. |
| Note                        | For research use only   |
| Application notes           | Anti-Streptavidin Peroxidase antibody has been  |
|                             | tested by ELISA and western blot. This product has<br>been assayed against 1.0 ug of Streptavidin in a<br>standard capture ELISA using ABTS (2,2'-azino-bis-[3-<br>ethylbenthiazoline-6-sulfonic acid]) for 30 minutes at<br>room temperature. Optimal concentrations in<br>immunoassays should be determined by researcher.                                      |
| lsotype                     | been assayed against 1.0 ug of Streptavidin in a<br>standard capture ELISA using ABTS (2,2'-azino-bis-[3-<br>ethylbenthiazoline-6-sulfonic acid]) for 30 minutes at<br>room temperature. Optimal concentrations in  |
