

## **Product Datasheet**

## **Bovine IgG Biotin Antibody (orb346006)**

Description	Bovine IgG Biotin Antibody
Conjugation	Biotin
Preservatives	0.01% (w/v) Sodium Azide
Form/Appearance	Lyophilized
Concentration	1.0 mg/mL
Storage	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Note	For research use only
Application notes	Devine InC whole melecule histin
	Bovine IgG whole molecule biotin conjugation can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.
Isotype	conjugation can be utilized as a control or standard reagent in Western Blotting and
	conjugation can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.
Isotype	conjugation can be utilized as a control or standard reagent in Western Blotting and ELISA experiments. IgG This product was prepared from normal serum delipidation, salt fractionation, ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti-Bovine IgG and anti-Bovine
