microscopy and

immunohistochemistry as well as other antibody-based enzymatic assays requiring lot-to-lot consistency.

Isotype IgG

Clonality Polyclonal

**Purity** Anti-Goat Secondary Antibody was

> prepared from monospecific antiserum by immunoaffinity chromatography using Goat IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase (calf intestine), anti-Rabbit Serum, Goat IgG and Goat
