

## Product Datasheet

### Rabbit IgG (H&L) antibody (FITC) (orb347650)

## Description

Rabbit IgG (H&L) antibody (FITC)

### Species/Host

Goat

### Reactivity

Rabbit

### Conjugation

FITC

### Tested

DOT, FC, FLISA, IF, WB

### Applications

### Immunogen

Rabbit IgG whole molecule

### Preservatives

0.01% (w/v) Sodium Azide

### Form/Appearance

Lyophilized

### Concentration

1.0 mg/mL

### Storage

Store secondary antibody at 4° C prior to restoration. For extended storage aliquot antibody and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

### Note

For research use only

### Application notes

Anti-Rabbit IgG Fluorescein Conjugate has been tested by dot blot and western blot. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment.

### Isotype

IgG

### Clonality

Polyclonal

### Purity

Secondary antibody conjugate was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-Goat Serum, Rabbit IgG and Rabbit Serum. No reaction was observed against Bovine, Chicken, Goat, Guinea Pig, Hamster, Horse, Human
