

Product Datasheet

Elisa Microwell Blocking Buffer With Stabilizer (orb348583)

Description

Elisa Microwell Blocking Buffer With

Conjugation

Unconjugated

Tested Applications

ELISA

Preservatives

See application note.

Form/Appearance

Liquid (sterile filtered)

Concentration

1X

Storage

Store container at 4° C before opening. Protect from moisture and light. No special shipping conditions or precautions are required.

Note

For research use only

Application notes

This product is a "ready-to-use" 1X solution for stabilizing ELISA plates for storage prior to ELISA. After coating with antigen or antibody, wash the contents of the ELISA microwells and add a sufficient volume of ELISA Microwell Blocking Buffer with Stabilizer to each well of the microplate. Let stand for 2h at room temperature. Aspirate contents of each well and allow the plate to dry. Seal the plate and store appropriately for future use. This buffer contains Tris buffered saline and proprietary reagents to block and stabilize ELISA plates. A proprietary combination of stabilizers and preservatives are used that is azide and mercury free.

Purity

This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.

Hazard Information

Non-Toxic

Dilution Range

ELISA: User Optimized
