

Product Datasheet

Rat Transferrin protein (Biotin) (orb420189)

Description	Rat Transferrin protein (Biotin)
Conjugation	Biotin
Preservatives	0.05% (w/v) Sodium Azide
Form/Appearance	Lyophilized
Concentration	2.0 mg/ml
Storage	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Note	For research use only
Application notes	Rat Transferrin Biotin Conjugated is a suitable protein for use as a control reagent in both Western Blotting and ELISA experiments. For blotting, the expected molecular weight of Rat Transferrin is approximately 80kDa.
Application notes	suitable protein for use as a control reagent in both Western Blotting and ELISA experiments. For blotting, the expected molecular weight of Rat Transferrin is
	suitable protein for use as a control reagent in both Western Blotting and ELISA experiments. For blotting, the expected molecular weight of Rat Transferrin is approximately 80kDa.
lsotype	suitable protein for use as a control reagent in both Western Blotting and ELISA experiments. For blotting, the expected molecular weight of Rat Transferrin is approximately 80kDa. Transferrin This product was prepared from normal serum in a multi-stage process including delipidation and selective precipitation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin,
