

Product Datasheet

Human IgG ELISA Kit (orb420517)

Description	Human IgG ELISA Kit
Reactivity	Human
Tested Applications	ELISA
Storage	See kit insert for component storage conditions. Store coating buffer, wash buffer, blocking buffer, standard, and reagent diluent at 4°C. Store substrate solution at 4°C prior to opening. Protect from moisture and light. Store detection antibody and SA-HRP conjugate vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Aliquot capture antibody and target protein standard contents and freeze at -20°C. Avoid multiple freeze-thaw cycles.
Note	For research use only
Application notes	Human IgG ELISA kit is designed for the quantitative detection of human IgG in serum, plasma, and hybridoma cell supernatants.
Clonality	Polyclonal
Purity	Rockland's human IgG AccuSignal ELISA Kit is an in vitro enzyme-linked immunosorbent assay designed for the quantitative detection of human IgG in serum, plasma, and hybridoma cell supernatants. This kit contains: Human IgG control, Capture antibody, biotinylated Detection Antibody, streptavidin-peroxidase conjugate, along with buffers and protocol. See protocol for details.
Expiration Date	Please enquire.
