

## Product Datasheet

### IgG antibody (Biotin) (orb436514)

|                            |                                                                   |
|----------------------------|-------------------------------------------------------------------|
| <b>Description</b>         | Rabbit polyclonal antibody against IgG conjugated to Biotin       |
| <b>Species/Host</b>        | Rabbit                                                            |
| <b>Reactivity</b>          | Mouse                                                             |
| <b>Conjugation</b>         | Biotin                                                            |
| <b>Tested Applications</b> | ELISA, FC, IH-Fr, IHC-P                                           |
| <b>Immunogen</b>           | Purified mouse IgG.                                               |
| <b>Target</b>              | IgG                                                               |
| <b>Preservatives</b>       | 0.09% Sodium Azide. Phosphate buffered saline                     |
| <b>Form/Appearance</b>     | F(ab') <sub>2</sub> fragment of IgG conjugated to biotin - liquid |
| <b>Concentration</b>       | 1.0mg/ml                                                          |
| <b>Storage</b>             | +4°C, -20°C if preferred                                          |
| <b>Note</b>                | For research use only                                             |
| <b>Isotype</b>             | Polyclonal IgG                                                    |
| <b>Clonality</b>           | Polyclonal                                                        |
| <b>Expiration Date</b>     | 12 months from date of receipt.                                   |
