

## Product Datasheet

### Human PDGFA ELISA Kit (orb437446)

|                          |                                                                                                               |
|--------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Description</b>       | Human Platelet Derived Growth Factor<br>Subunit A (PDGFA) Sandwich ELISA Kit                                  |
| <b>Reactivity</b>        | Human                                                                                                         |
| <b>Range</b>             | 0.156-10ng/mL                                                                                                 |
| <b>Form/Appearance</b>   | Traditional                                                                                                   |
| <b>Storage</b>           | All reagents should be kept according to the<br>instructions on the packaging upon receipt.                   |
| <b>Note</b>              | For research use only                                                                                         |
| <b>Application notes</b> | serum, plasma, tissue homogenates, cell<br>lysates, cell culture supernates and other<br>biological fluids.   |
| <b>Sample Types</b>      | serum, plasma, tissue homogenates, cell<br>lysates, cell culture supernatants and other<br>biological fluids. |
| <b>Uniprot ID</b>        | <b>P04085</b>                                                                                                 |
| <b>Sensitivity</b>       | 0.063ng/mL                                                                                                    |
| <b>Entrez</b>            | <b>5154</b>                                                                                                   |
| <b>Expiration Date</b>   | Please enquire.                                                                                               |
