Application notes

This protein carries a polyhistidine tag at the C-terminus. The mature form of Mucin-1 is a non-covalent heterodimeric complex with the proteolytically cleaved partial α and partial β chain. Each partial α and partial β chain has a calculated MW of 21.3 kDa (partial α chain) and 8.4 kDa (partial β chain). The protein migrates as 45-80 kDa (partial α and partial β chain) and 10 kDa (partial β chain) under reducing (R) condition (SDS-PAGE) due to glycosylation.
