| Endotoxins        | Not test.   |   |
| Preservatives     | If the delivery form is liquid, the default storage buffer is Tris/PBS-based<br>buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the<br>buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH<br>8.0.   |   |
| Form/Appearance   | Liquid or Lyophilized powder  | 0.5   |
| Storage           | The shelf life is related to many factors, storage state, buffer<br>ingredients, storage temperature and the stability of the protein itself.<br>Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The<br>shelf life of lyophilized form is 12 months at -20°C/-80°C.  |   |
