

Product Datasheet

Gm4841 antibody (orb750548)

Description

Gm4841 antibody

Species/Host

Rabbit

Reactivity

Mouse

Conjugation

Unconjugated

Tested

ELISA, WB

Applications
Immunogen

IFN Induced GTPase Like Protein was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to a N-terminal region of mouse IFN Induced GTPase Like Protein.

Preservatives

0.01% (w/v) Sodium Azide

Form/Appearance

Liquid (sterile filtered)

Concentration

86.5 mg/mL

Storage

Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Note

For research use only

Application notes

Anti-IFN Induced GTPase Like Protein has been tested by ELISA and Western Blot. Expect a band at ~48 kDa by western blotting in the appropriate cell lysate or extract.

Isotype

IgG

Clonality

Polyclonal

Purity

Anti-IFN Induced GTPase Like Protein Antibody was prepared from monospecific, delipidated and defibrinated antiserum, with addition of sodium azide to 0.01%. A BLAST analysis was used to suggest cross-reactivity with IFN Induced GTPase Like Protein from mouse based on a 100% homology with the immunizing sequence. Reactivity against homologues from other sources is not known.
