Background

This gene encodes a protein that shares high sequence similarity with ribosomal protein L26. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by RefSeq, Dec 2015],

Western Blot analysis of various cells using Ribosomal Protein L26L Polyclonal Antibody diluted at 1:2000

Immunohistochemical analysis of paraffin-embedded Human brain. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negative contrl (right) obtained from antibody was pre-absorbed by i

Western blot analysis of lysates from HUVEC and MCF-7 cells, using RPL26L Antibody. The lane on the right is blocked with the synthesized peptide.
