

## Septin 7 rabbit pAb

**Cat#: orb766301 (Manual)** 

For research use only. Not intended for diagnostic use.

**Product Name** Septin 7 rabbit pAb

**Host species** Rabbit

**Applications** WB;IHC;IF;ELISA

**Species Cross-Reactivity** Human; Mouse; Rat

**Recommended dilutions** Western Blot: 1/500 - 1/2000.IHC-p:1:50-300 ELISA: 1/20000. Not yet

tested in other applications.

**Immunogen** The antiserum was produced against synthesized peptide derived from

human SEPT7. AA range:350-399

Septin 7 Polyclonal Antibody detects endogenous levels of Septin 7 protein. **Specificity** 

**Formulation** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage** 

**Protein Name** Septin-7

SEPT7 Gene Name

Cellular localization Cytoplasm . Chromosome, centromere, kinetochore . Cytoplasm,

cytoplashi. Chromosoffie, centrollere, knietochote. Cytoplashi, cytoskeleton, spindle. Cleavage furrow. Midbody. Cytoplasm, cytoskeleton, cilium axoneme. Cell projection, cilium, flagellum. Distributed throughout the cytoplasm in prometaphase cells. Associated with the spindle during metaphase. Associated with the central spindle and at the cleavage furrow in anaphase cells. Detected at the midbody in telophase. Associated with actin stress fibers (By similarity). Found in the sperm

annulus (PubMed:25588830). .

**Purification** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Clonality** Polyclonal

Concentration 1 mg/ml

Observed band 48kD

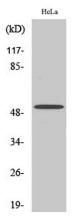

Human Gene ID 989

Human Swiss-Prot Number Q16181

Alternative Names SEPT7; CDC10; Septin-7; CDC10 protein homolog

## **Background**

septin 7(SEPT7) Homo sapiens This gene encodes a protein that is highly similar to the CDC10 protein of Saccharomyces cerevisiae. The protein also shares similarity with Diff 6 of Drosophila and with H5 of mouse. Each of these similar proteins, including the yeast CDC10, contains a GTP-binding motif. The yeast CDC10 protein is a structural component of the 10 nm filament which lies inside the cytoplasmic membrane and is essential for cytokinesis. This human protein functions in gliomagenesis and in the suppression of glioma cell growth, and it is required for the association of centromere-associated protein E with the kinetochore. Alternative splicing results in multiple transcript variants. Several related pseudogenes have been identified on chromosomes 5, 7, 9, 10, 11, 14, 17 and 19. [provided by RefSeq, Jul 2011],

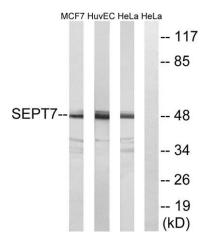

Western Blot analysis of various cells using Septin 7 Polyclonal Antibody

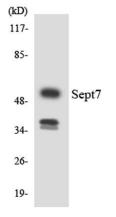

Explore. Bioreagents.

Western blot analysis of lysates from HeLa, HUVEC, and MCF-7 cells, using SEPT7 Antibody. The lane on the right is blocked with the synthesized peptide.

Western blot analysis of the lysates from HUVECcells using SEPT7 antibody.

Immunohistochemical analysis of paraffin-embedded human tonsil. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 30min).
