

## CDHF11 rabbit pAb

Cat#: orb767925 (Manual)

For research use only. Not intended for diagnostic use.

Product Name CDHF11 rabbit pAb

Host species Rabbit

Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Rat; Mouse;

**Recommended dilutions** Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000.

ELISA: 1/20000. Not yet tested in other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human CELSR3. AA range:91-140

Specificity CDHF11 Polyclonal Antibody detects endogenous levels of CDHF11

protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Cadherin EGF LAG seven-pass G-type receptor 3

Gene Name CELSR3

Cellular localization Cell membrane; Multi-pass membrane protein.

**Purification** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Clonality** Polyclonal

1 mg/mlConcentration

**Observed band** 

**Human Gene ID** 1951

**Human Swiss-Prot Number** Q9NYQ7

**Alternative Names** 

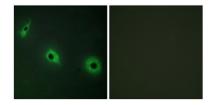

CELSR3; CDHF11; EGFL1; FMI1; KIAA0812; MEGF2; Cadherin EGF LAG seven-pass G-type receptor 3; Cadherin family member 11; Epidermal growth factor-like protein 1; EGF-like protein 1; Flamingo homolog 1; hFmi1; Multiple epidermal growth factor-

**Background** 

This gene belongs to the flamingo subfamily, which is included in the cadherin superfamily. The flamingo cadherins consist of nonclassic-type cadherins that do not interact with catenins. They are plasma membrane proteins containing seven epidermal growth factor-like repeats, nine cadherin domains and two laminin A G-type repeats in their ectodomain. They also have seven transmembrane domains, a characteristic feature of their

subfamily. The encoded protein may be involved in the regulation of contactdependent neurite growth and may play a role in tumor formation. [provided
