

Moesin/Ezrin/Radixin (phospho Thr558) rabbit pAb

Cat#: orb769158 (Manual)

For research use only. Not intended for diagnostic use.

Product Name Moesin/Ezrin/Radixin (phospho Thr558) rabbit pAb

Host species Rabbit

Applications WB;IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Recommended dilutions

Immunofluorescence: 1/200 - 1/1000. ELISA: 1/5000. Not yet tested in other

applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human Moesin/Ezrin/Radixin around the phosphorylation site of Thr558. AA

range:524-573

Phospho-Moesin/Ezrin/Radixin (T558) Polyclonal Antibody detects **Specificity**

endogenous levels of Moesin/Ezrin/Radixin protein only when

phosphorylated at T558.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Store at -20°C. Avoid repeated freeze-thaw cycles. **Storage**

Protein Name Moesin

Gene Name **MSN**

Cellular localization

Cell membrane; Peripheral membrane protein; Cytoplasmic side. Cytoplasm, cytoskeleton. Apical cell membrane; Peripheral membrane protein; Cytoplasmic side. Cell projection, microvillus membrane; Peripheral membrane protein; Cytoplasmic side. Cell projection, microvillus. Phosphorylated form is enriched in microvilli-like structures at apical membrane. Increased cell membrane localization of both phosphorylated and non-phosphorylated forms seen after thrombin treatment.

phosphorylated and non-phosphorylated forms seen after thrombin treatment

(By similarity). Localizes at the uropods of T lymphoblasts. .

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

epitope-specific immunogen. chromatography using

Clonality Polyclonal

Concentration 1 mg/ml

Observed band 67kD

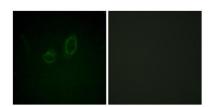

Human Gene ID 4478/5962

Human Swiss-Prot Number P26038/P35241/P15311

MSN; Moesin; Membrane-organizing extension spike protein; RDX; Radixin; EZR; VIL2; Ezrin; Cytovillin; Villin-2; p81 **Alternative Names**

Background

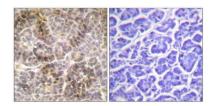

Moesin (for membrane-organizing extension spike protein) is a member of the ERM family which includes ezrin and radixin. ERM proteins appear to function as cross-linkers between plasma membranes and actin-based cytoskeletons. Moesin is localized to filopodia and other membranous protrusions that are important for cell-cell recognition and signaling and for cell movement. [provided by RefSeq, Jul 2008],

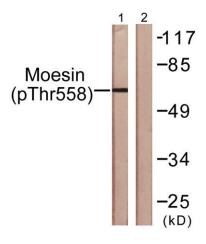

Immunofluorescence analysis of A549 cells, using Moesin/Ezrin/Radixin (Phospho-Thr558) Antibody. The picture on the right is blocked with the phospho peptide.

Immunohistochemistry analysis of paraffin-embedded human pancreas, using Moesin/Ezrin/Radixin (Phospho-Thr558) Antibody. The picture on the right is blocked with the phospho peptide.

Western blot analysis of lysates from NIH/3T3 cells, using Moesin/Ezrin/Radixin (Phospho-Thr558) Antibody. The lane on the right is blocked with the phospho peptide.
