

AZ1 rabbit pAb

Cat#: orb769315 (Manual)

For research use only. Not intended for diagnostic use.

Product Name AZ1 rabbit pAb

Host species Rabbit

Applications WB;IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA: 1/40000,WB 1:500-2000

Immunogen The antiserum was produced against synthesized peptide derived from

human OAZ1. AA range:14-63

Specificity AZ1 Polyclonal Antibody detects endogenous levels of AZ1 protein.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Ornithine decarboxylase antizyme 1

Gene Name OAZ1

Cellular localization nucleus, cytoplasm, cytosol,

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Clonality Polyclonal

Explore. Bioreagents.

Concentration 1 mg/ml

Observed band

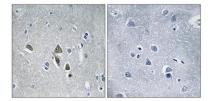

Human Gene ID 4946

Human Swiss-Prot Number P54368

Alternative Names OAZ1; OAZ; Ornithine decarboxylase antizyme 1; ODC-Az

Background

The protein encoded by this gene belongs to the ornithine decarboxylase antizyme family, which plays a role in cell growth and proliferation by regulating intracellular polyamine levels. Expression of antizymes requires +1 ribosomal frameshifting, which is enhanced by high levels of polyamines. Antizymes in turn bind to and inhibit ornithine decarboxylase (ODC), the key enzyme in polyamine biosynthesis; thus, completing the auto-regulatory circuit. This gene encodes antizyme 1, the first member of the antizyme family, that has broad tissue distribution, and negatively regulates intracellular polyamine levels by binding to and targeting ODC for degradation, as well as inhibiting polyamine uptake. Antizyme 1 mRNA contains two potential in-frame AUGs; and studies in rat suggest that alternative use of the two translation initiation sites results in N-terminally distinct protein isoforms

Immunohistochemistry analysis of paraffin-embedded human brain tissue, using OAZ1 Antibody. The picture on the right is blocked with the synthesized peptide.
