

PDGFR-α (phospho Tyr762) rabbit pAb

Cat#: orb769407 (Manual)

For research use only. Not intended for diagnostic use.

Product Name PDGFR-α (phospho Tyr762) rabbit pAb

Host species Rabbit

Applications IHC;IF;ELISA

Species Cross-Reactivity Human; Mouse; Rat

Recommended dilutions Immunohistochemistry: 1/100 - 1/300. ELISA: 1/10000. Not yet tested in

other applications.

Immunogen The antiserum was produced against synthesized peptide derived from

human PDGFR alpha around the phosphorylation site of Tyr762. AA

range:731-780

Specificity Phospho-PDGFR-α (Y762) Polyclonal Antibody detects endogenous levels

of PDGFR-α protein only when phosphorylated at Y762.

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium

azide..

Storage Store at -20°C. Avoid repeated freeze-thaw cycles.

Protein Name Platelet-derived growth factor receptor alpha

Gene Name PDGFRA

Cellular localization Cell membrane; Single-pass type I membrane protein. Cell projection,

cilium . Golgi apparatus .

Purification The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Clonality Polyclonal

Concentration 1 mg/ml

Observed band

Human Gene ID 5156

Human Swiss-Prot Number P16234

Alternative Names PDGFRA; PDGFR2; RHEPDGFRA; Platelet-derived growth factor receptor

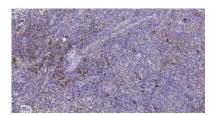

alpha; PDGF-R-alpha; PDGFR-alpha; Alpha platelet-derived growth factor receptor; Alpha-type platelet-derived growth factor receptor; CD140 antigen-

like family member A; CD14

Background This gene encodes a cell surface tyrosine kinase receptor for members of the platelet-derived growth factor family. These growth factors are mitogens for

cells of mesenchymal origin. The identity of the growth factor bound to a cells of mesenchymal origin. The identity of the growth factor bound to a receptor monomer determines whether the functional receptor is a homodimer or a heterodimer, composed of both platelet-derived growth factor receptor alpha and beta polypeptides. Studies suggest that this gene plays a role in organ development, wound healing, and tumor progression. Mutations in this gene have been associated with idiopathic hypereosinophilic syndrome, somatic and familial gastrointestinal stromal tumors, and a variety of other cancers. Introvided by RefSeq. Mar 20121

tumors, and a variety of other cancers. [provided by RefSeq, Mar 2012],

Immunohistochemical analysis of paraffin-embedded human tonsil. 1. Tris-EDTA,pH9.0 was used for antigen retrieval. 2 Antibody was diluted at 1:200(4° overnight.3,Secondary antibody was diluted at 1:200(room temperature, 45min).
