

## Neurocalcin $\delta$ rabbit pAb

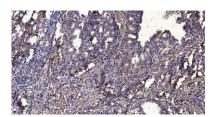

## Cat#: orb770597 (Manual)

For research use only. Not intended for diagnostic use.

| Product Name             | Neurocalcin δ rabbit pAb  |
|--------------------------|---|
| Host species             | Rabbit  |
| Applications             | IHC;IF;ELISA  |
| Species Cross-Reactivity | Human;Mouse;Rat   |
| Recommended dilutions    | Immunohistochemistry: 1/100 - 1/300. ELISA: 1/20000. Not yet tested in other applications.                                |
| Immunogen                | Synthesized peptide derived from Neurocalcin $\delta$ . at AA range: 370-450  |
| Specificity              | Neurocalcin $\delta$ Polyclonal Antibody detects endogenous levels of Neurocalcin $\delta$ protein.                       |
| Formulation              | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide  |
| Storage                  | Store at -20°C. Avoid repeated freeze-thaw cycles.  |
| Protein Name             | Neurocalcin-delta   |
| Gene Name                | NCALD   |
| Cellular localization    | intracellular,cytosol,clathrin coat of trans-Golgi network vesicle,extracellular exosome,                                 |
| Purification             | The antibody was affinity-purified from rabbit antiserum by affinity-<br>chromatography using epitope-specific immunogen. |
| Clonality                | Polyclonal  |

| Concentration           | 1 mg/ml   |
|-------------------------|---|
| Observed band           |   |
| Human Gene ID           | 83988   |
| Human Swiss-Prot Number | P61601  |
| Alternative Names       | NCALD; Neurocalcin-delta  |
|                         |   |
| Background              | This gene encodes a member of the neuronal calcium sensor (NCS) family of calcium-binding proteins. The protein contains an N-terminal myristoylation signal and four EF-hand calcium binding loops. The protein is cytosolic at resting calcium levels; however, elevated intracellular calcium levels induce a conformational change that exposes the myristoyl group, resulting in protein association with membranes and partial co-localization with the perinuclear trans-golgi network. The protein is thought to be a regulator of G protein-coupled receptor signal transduction. Several alternatively spliced variants of this gene have been determined, all of which encode the same protein; additional variants may exist but their biological validity has not been determined. [provided by RefSeq, Jul 2008], |

Immunohistochemical analysis of paraffin-embedded human Gastric adenocarcinoma. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
