

Product Datasheet

Vazyme - FlysisAmp Cells Lysis Kit (CL101-01)

Catalog Number	CL101-01
Category	Tools
Description	<p>The FlysisAmp Cells Lysis Kit is a fast, efficient kit for harvesting cellular RNA and is compatible with 10 - 10⁶ cultured cells (adherent or suspension cells). Genomic DNA elimination and RNA acquisition can be completed directly in the cell culture plate, and the whole process only takes 7 min. This method does not require the steps of heating, washing, tube transfer, and centrifugation in traditional extraction methods, which improves efficiency while also reducing losses during sample purification. This kit is compatible with a wide range of cell types and cell quantities, and can also solve the problem of unsatisfactory extraction results with low cell numbers in traditional extraction methods. This kit can be used for high-throughput (96-/384-well cell culture plate) acquisition of cellular RNA and for various downstream experiments such as RT-PCR and RT-qPCR.</p>
Usage Notes	Restricted to UK and Ireland's customers ONLY
Storage	Store at -30 ~ -15°C and transport at ≤0°C.
Background	Only available for the UK and Republic of Ireland
Note	For research use only
Expiration Date	12 months from date of receipt.
