# Vazyme - VAHTS HiFi Universal Amplification Mix for MGI (SI) (NM618-02)

<b>Catalog Number</b>	NM618-02
<b>Description</b>	VAHTS HiFi Universal Amplification Mix for MG1 (SI) is an upgraded version of VAHTS HiFi Amplification Mix, it is designed for the amplification of next-generation sequencing libraries prepared for MGI sequencing. Through directed optimization, VAHTS HiFi DNA Polymerase has excellent compatibility of the template and amplification sensitivity. Combined with an optimized buffer system, VAHTS HiFi Universal Amplification Mix for MG1(S) can achieve highly uniform library amplification, thus significantly improving the quality of sequencing. It contains special protective agent, which enables long-term storage and maintain stable in activity after repeated freezing and thawing, All the reagents have undergone rigorous quality control and functional testing to ensure the optima stability and repeatability of library preparation.
<b>Storage</b>	Store at -30 ~ -15°C and transport at ≤0°C.
<b>Note</b>	For research use only
<b>Application notes</b>	Excellent Amplification Uniformity. Extensive Template Compatibility. Excellent Storage Stability.
<b>Expiration Date</b>	12 months from date of receipt.
