

Product Datasheet

Vazyme - 2 × Taq Master Mi (P111-01)

Catalog Number P111-01

Category Tools

Description This product contains Tag DNA Polymerase, dNTP, and an optimized buffer

system. It only needs to add primers and templates to perform amplification reaction, thereby reducing pipetting operations and improving detection throughput and reproducibility of results. The amplification system contains protective agents that keep $2 \times M$ aster Mix stable in activity after repeated freezing and thawing. This product is available in a version containing loading buffer, so PCR products can be directly loaded for electrophoresis after the reaction, which is convenient to use. The PCR product has an adenine at the 3' end that can be cloned into the T vector. It is also compatible with ClonExpress

and TOPO cloning kits (Biorbyt #C112/C113/C116/C603).

Application notes Classic and reliable performance: Optimized buffer system, easy to get ideal

amplification results quickly Convenient operation: Ready-to-use mix; pre-mixed

formulation saves time and reduces contamination

Storage Store at -30 \sim -15°C and transport at \leq 0°C.

Background Only available for the UK and Republic of Ireland

Note For research use only
